**Culvert Requirements**  
**For existing improvements and new construction/development.**

Effective: November 1, 2005

Ordinance No. 2005-40

To: Owner / Applicant /Contractor

From: Street & Bridge Department 713-947-7700 Ext. 360 or 370

Subject: Culvert Requirements

1. A culvert application followed by a permit is required from the Inspection Department before any installation is started.
2. The Street & Bridge Department will furnish you with the culvert size that will be required.
3. Owner/Contractor shall call Texas DIG. 1-800-344-8377 before you dig.
4. All culverts must have plugs, grates & saddle if needed at time of delivery.
5. The property owner or contractor must mark where culverts are to be set with paint, rods, or flags.
6. Culverts must be set in stabilize material of 3 (three) sack stabilize sand. The city does not provide any stabilizing material, such as backfill, dirt, or cement.
7. It is the owners or contractors responsibility to measure & order the pipe. Not the City. No used culverts allowed.
8. Call the Street & Bridge Department once material is delivered to schedule a date for the installation of the culverts.
